TECHNICAL BULLETIN

Material Manufacturing Changes

Effective October 1, 2010 the following roofing material manufacturers have advised ARCA Warranty Ltd. of the following changes to their manufacturing process.

a) **IKO INDUSTRIES LTD.**

Western Louiseville Fiberboard Inc. has purchased the production of IKO's roofing fiberboard.

Please be advised that Western Louiseville manufactured roofing fiberboard is not accepted for the Warranty Certificate Program.

IKO Roof Board may be used for WC projects currently under construction until the IKO manufactured roofing fiberboard inventory has been exhausted. Accepted fiberboard products included under Section 5 - Insulation of the Low-Slope Roofing Application Standards must be used for all WC projects until Western Louiseville has completed ARCA Warranty Ltd's insulation acceptance criteria and their fiberboard has received Board approval.

b) **SIPLAST CANADA**

Siplast Canada is standardizing their Paradiene 20 base ply product offerings on light sand surfaced sheets. Siplast offers both a film top surface and a light sand top surface for Paradiene 20 HT TG, Paradiene 20 TG and Paradiene 20 TS SA.

Because of the much higher demand for sand-surface sheets, film surfaced Paradiene 20 HT TG F, Paradiene 20 TG F and Paradiene 20 TS SA F (note "F" denotes film) will be available as Special Made to Order products. Please allow three (3) weeks lead time in addition to the usual shipping time for delivery of Special Made to Order products.

For further assistance please contact Siplast Canada.
