Advisory Bulletin

Dear Manufacturing Members:

RE: Membrane Approvals

The ARCA Warranty Ltd. has made a revision to our membrane approval protocol.

For our Manufacturing members, in good standing, who have been compliant with all membership rules and who have participated in our warranty program for at least five years, ARCA is prepared to replace the two-year experience criteria with the following conditions:

1. The manufacturer provides a \$250,000.00 penal bond to ARCA for the product in question.
2. The manufacturer provides a letter of indemnity for the full term of the warranty for each specific project.
3. The system meets all the manufacturer's system requirements.
4. The system meets ARCA standards.

This change will allow our trusted partners to introduce new membranes in a timely manner, while providing the ARCA with a guarantee of support. Once the two-year period has passed, the manufacturer may apply to have the product moved into the accepted products list through the Technical Committee.

Soprema has taken advantage of this protocol to receive approval for their Fire Rated Cap sheets.

The products following this protocol will be accepted for 5,10 and 15 year warranties as long as they meet the ARCA standards.

Please contact the ARCA if you have any questions.
